

CURRICULUM VITAE

Gideon (Jozua) Kotzé

Current residence: Pretoria, South Africa

Email: gidi8ster@gmail.com

Website: www.gideonkotze.co.za

PERSONAL INFORMATION

Nationality: South African

Date of birth: 9 June 1981

Languages: In order of proficiency: Afrikaans (mother tongue), English, Dutch, German and French, limited knowledge of Xhosa (high school education) and Japanese (spoken language course)

WORKING EXPERIENCE

- 2014- Postdoctoral Fellow at University of South Africa (UNISA)
- 2012 Designed and implemented a system using transformation-based learning to correct and apply high accuracy tree-to-tree alignments between phrase-structure trees. The goal is the creation of large-scale parallel treebanks for syntax-based machine translation, as with the PaCo-MT project (see below). A paper on this work was published in the Computational Linguistics in the Netherlands (CLIN) Journal of 2012. This work was done as part of the research done for my Ph.D project (see Education).
- 2009 Taught a Bachelors level course at the University of Groningen “Tekstmanipulatie” (Text Manipulation) with Dr Barbara Plank.
- 2008-2011 I worked on the machine translation project Parse and Corpus-Based Machine Translation (PaCo-MT) with the Catholic University of Leuven, Belgium, and the company OneLiner bvba in Sint Niklaas, Belgium. The other members of the consortium consisted of Frank van Eynde, Vincent Vandeghinste, Jörg Tiedemann, Joachim van den Bogaert and Koen Desmet. My main task consisted of the finding or development and subsequent application of tools for the production of large parallel treebanks for use in the MT system. The main technologies applied in this task were tokenisation, sentence alignment, word alignment, syntactic parsing and tree-to-tree alignment. The concerned language pairs were Dutch to French, French to Dutch, Dutch to English, and English to Dutch.
- 2008 Contract work completed for the Centre for Text Technology (CTeXT) in Potchefstroom, South Africa. Main activity comprised the extension of the abovementioned Afrikaans wordnet to a total of 10 068 entries, in which English entries were mostly translated into Afrikaans and some data manipulation was done by programming in Perl.
- 2006-2007 Temporary position as data developer and researcher at the Centre for Text Technology (CTeXT) at the Potchefstroom campus of the North-West University, with Professor Gerhard van Huyssteen as the head of the centre. Activities included: morphological analysis and quality control, data manipulation by programming in Perl, the design of databases (specifically *ALEXANDER* (Afrikaans Lexicon and Annotated Database for Engineering and Research)), linguistic examination and quality control of lexica, corpus analysis and translation.

- 2006 Internship at the Vrije Universiteit in Amsterdam as part of M.A. training. Position: Fellow worker of a project called *Cornetto* (Combinatorial and Relational Network as Toolkit for Dutch Language Technology) , an electronic lexical database in Dutch for human language technological purposes. Various institutions are involved. The activities included semantic annotation and data manipulation by programming.
- 2002-2004 Computer assistant/consultant at the former University of Port Elizabeth in computer labs for general use.

COMPUTER SKILLS

Text production and relevant skills

Microsoft Office (Excel, Word, Access, Powerpoint), OpenOffice (the text, spreadsheet and presentation features), LaTeX. I also have experience using various editors such as Emacs, Nano, Kate, Kwrite, TexShop, TexMaker and Sublime Text 2, for both text production and programming.

Programming

Perl (self-taught, main language of choice for the PaCo-MT project and my PhD research), Bash (also used in this project and research), Python (basic knowledge), C++ and Java (Bachelor level courses), R (self-taught, applied for PhD research in a limited fashion), Turbo Pascal (secondary school course). I acquired some knowledge of XHTML, JavaScript, VBScript and ASP as part of a Web Technology course on Bachelor level. Some experience with databases (Microsoft Access, SQL). As a means of representing data I have much experience in the use of XML and have worked with tools such as XML Copy Editor. Finally, I have experience using the version control software Git and still use it regularly at work.

Computational linguistics tools

Statistical machine translation toolkits (Moses), hybrid machine translation (PaCoMT), word alignment tools (GIZA++, FastAlign), manual alignment tools (InterText, Stockholm TreeAligner), POS taggers (e.g. TreeTagger), syntactic parsers (Stanford, Berkeley, Alpino, MaltParser), the syntactic tree aligners Lingua-Align, Dublin Sub-Tree Aligner and TBLign (own software).

Linguistic software

MultiTerm, WordSmith, Alchemist, Stockholm TreeAligner.

LEADERSHIP POSITIONS

- 2006-2007 Centre for Text Technology (CTexT) at the Potchefstroom campus of the North-West University:
- Project leader of the lexical database *ALEXANDER* (Afrikaans Lexicon and Annotated Database for Engineering and Research) (2006)
 - Project leader of the Afrikaans WordNet (2007 – see “EDUCATION”)

EDUCATION

- Institutions:** - Rijksuniversiteit Groningen (University of Groningen) in Groningen, The Netherlands

- The former University of Port Elizabeth (presently the Nelson Mandela Metropolitan University)
 - Eberhard Karls University in Tübingen, Germany
 - Vrije Universiteit (Free University) in Amsterdam, The Netherlands
 - Distance course in General Linguistics at the University of South Africa (2001)
- 2011 Attended European Summer School in Logic, Language and Information (ESSLLI) in Ljubljana, Slovenia.
- 2011 Attended a Machine Learning course at the University of Groningen, resulting in a paper with the title “Authorship attribution of weblog texts: A comparative study”.
- 2010 Attended ESSLLI summer school in Copenhagen, Denmark.
- 2010 Attended the 4th Machine Translation Marathon at Dublin City University in Dublin, 2010.
- 2009 Attended ESSLLI summer school in Bordeaux, France.
- 2008-2013 **Doctor of Philosophy (Computational Linguistics)**
- 2013 Doctoral dissertation completed and accepted for public defense: *Complementary approaches to tree alignment: Combining statistical and rule-based methods*. In this work, the alignment of syntactic phrase-structures of translated texts is researched in order to create so-called *parallel treebanks*, of which the main application is syntax-based machine translation. Although the effect on the performance of such translation is found lacking, it is shown that various different novel approaches to the alignment problem can be successfully combined to create a high-quality resource.
- 2005-2007 **Master of Arts in Linguistics (Lexicology and Terminology)**
- 2007 Thesis completed: *Building a WordNet for Afrikaans: Preliminary research in the form of an inquiry into the feasibility and optimal methodology for the development of a wordnet database*. The work is a preliminary study about a proposed project at the North-West University in Potchefstroom, South Africa. It deals with the design and building of an Afrikaans wordnet – a semantic network stored as an electronic lexical database – for lexicographic and human language technological purposes. The project has been sponsored by the South African Department of Science and Technology.
- 2005-2006 Courses at the Vrije Universiteit (Free University) in Amsterdam, The Netherlands (names are in Dutch): “Lexicografische en Terminologische Tools” (Lexicographic and Terminological Tools), “Bilinguale Lexicografie” (Bilingual Lexicography), “Werkcollege Lexicologie” (Seminar in Lexicology), “Werkcollege Terminologie” (Seminar in Terminology), “Lexicale Semantiek” (Lexical Semantics), “Computationale Lexicologie” (Computational Lexicology) (no examination), “Relationele Modellen” (Relational Models), “Vaktaal” (Technical Language).
- 2004-2005 **B.A. Honours in Applied Language Studies (Translation Studies)** (*cum laude*)
- 2004 Courses at the University of Port Elizabeth: Introduction to General Linguistics, Applied Linguistics, Theory of Translation.

- Courses at the Eberhard Karls University in Tübingen, Germany: Computational Linguistics (Parsing and Programming in Java (Data Structures)), Advanced German, Spoken German.
- 2000-2003 **B.A. in Applied Language Studies** (*cum laude*)
- 2003 Courses: Afrikaans III (mainly Linguistics and Literature), German III, French III and Music Technology.
- 2001-2002 Courses: Afrikaans I and II, German I and II and French I and II. Additional Courses: Programming in C++, Programming in Java (Algorithmics and Data Structures, Web Technology, Mathematics (Algebra and Calculus), Information Systems and Computer Architecture.
- 2000 Courses: Afrikaans, Dutch, Introduction to University Practice and Computer Literacy.

Talks and presentations

- Joint oral presentation with Friedel Wolff on 20 August 2015 at the National Conference on Multilingualism in Higher Education at UNISA in Pretoria, South Africa, with the title “Machine Translation at UNISA”.
- Oral presentation on 26 June 2015 at the LSSA/SAALA/SAALT joint conference at the North-West University in Potchefstroom, South Africa, with the title “Applying English morphological segmentation to syllable-based Zulu-to-English statistical machine translation”.
- Oral presentation on 27 May 2014 at the SaLTMiL Workshop on free/open-source language resources for the machine translation of less-resourced languages, at LREC 2014, in Reykjavik, Iceland.
- Defence of my doctoral dissertation at the University of Groningen on 24 June 2013, resulting in the conferment of a PhD degree.
- Poster presentation at the Student Session of ESSLLI 2011 in Ljubljana, Slovenia. Title: Improving syntactic tree alignment through rule-based error correction. (published)
- Oral presentation at Corpus Linguistics 2011 in Saint Petersburg, Russia. Title: Rule-induced error correction of aligned parallel treebanks. (published)
- Poster presentation at NODALIDA 2011 in Riga, Latvia. Title: Finding Statistically Motivated Features Influencing Subtree Alignment Performance. (published)
- Talk at Computational Linguistics in the Netherlands (CLIN) 2011 in Ghent, Belgium. Title: Finding Statistically Motivated Features Influencing Subtree Alignment Performance.
- Invited in 2010 by Prof. Dr. Martin Volk as a colloquium speaker at the Institute for Computational Linguistics at the University of Zürich. The topic was the tree-to-tree alignment tool *Lingua-Align* developed by Jörg Tiedemann. I presented the published conference paper authored by Tiedemann at LREC 2010 in Malta.
- Oral presentation at TABU Dag 2010 in Groningen. Title: Supervised tree alignment for syntax-based machine translation.

- Poster presentation at Computational Linguistics in the Netherlands (CLIN) 2010 in Utrecht, The Netherlands. Title: Discriminative parallel treebank alignment for syntax-based machine translation.
- Oral presentation presented at TLT'09 in Milan, Italy. Published in proceedings and co-authored with Jörg Tiedemann. Title: Building a Large Machine-Aligned Parallel Treebank. (published)
- Poster presentation at TABU Dag 2009 in Groningen. Title: Training a statistical parser for parsing French for use in syntax-based machine translation.
- Oral presentation presented at Computational Linguistics in the Netherlands (CLIN) 2009. Title: Automatic filtering of parallel corpora for improving alignment accuracy.
- Oral presentation presented at ALASA conference (International Conference of the African Language Association of Southern Africa) in Port Elizabeth, South Africa, 9-11 July 2007. Title: *Development of an Afrikaans wordnet: methodology and integration*.
- Oral presentation at LSSA/SAALA/SAALT joint conference (Linguistic Society of Southern Africa (LSSA), the South African Applied Linguistics Association (SAALA) and the South African Association for Language Teaching (SAALT)) in Potchefstroom, South Africa, 4-6 July 2007. Title (in Afrikaans): *Ontwikkeling van 'n Afrikaanse woordnet: metodologie en integrasie* (Development of an Afrikaans wordnet: methodology and integration)

Scholarships, awards, funding and others

- Obtained funding for partaking in a machine translation project, PaCo-MT, from 2008-2011 as part of my PhD program at the University of Groningen (2008-2013). After completion of the project in 2011, the University funded the rest of my research activities up to the end of 2012.
- ZASM (Zuid-Afrikaanse Spoorwegmaatschappij) scholarship for Masters study in Amsterdam, The Netherlands (2005-2006)
- Rutgers scholarship from the Vrije Universiteit's Department of Arts (Letteren) for Masters study in Amsterdam, The Netherlands (2005-2006)
- Project funds received at the South African Department of Science and Technology for the construction of an Afrikaans wordnet (see "EDUCATION") at the Centre for Text Technology (CTexT) at the Potchefstroom campus of the North-West University, South Africa (2006)
- Member of the *Landesstiftung Baden-Württemberg* in Germany (a foundation enabling scholars, students and young working people to study in Baden-Württemberg, Germany) (2004)
- Chosen as exchange student (representing the former University of Port Elizabeth) for the summer semester of 2004 at the University of Tübingen, Germany, with the simultaneous conferment of the Baden-Württemberg scholarship for the exchange programme (2004)
- Postgraduate scholarship at the University of Port Elizabeth (2004)
- Dean's scholarship at the University of Port Elizabeth (2004)
- Sponsored as participant in a French course and cultural programme at the University of Réunion, Réunion (France) (2003)
- Member of the Golden Key International Honour Society (2003)

- DAAD (*Deutscher Akademischer Austausch Dienst*) scholarship for German study in South Africa (2003)
- Merit bursaries at the University of Port Elizabeth (2000-2003)
- Dux pupil: Matric 1999 (best position in final year at high school)

INTERESTS AND HOBBIES:

I am interested in all the various ways in which we can describe and model language, how languages are the same and how they differ from each other, all the various useful things which we can do with all this knowledge, and what it tells us about the human experience. I have a passion for the digital (resource and technological) development of under-resourced languages especially in the South African context. This comes to fruition in disciplines such as corpus linguistics, lexicography, machine translation, manual and automatic bitext alignment, language modeling, syntactic parsing, grammar acquisition and automated or semi-automated lexical database construction.

Many of these fields of expertise also have direct relevance to the industry as companies become more global and web-based. Intelligent processing of language online is becoming an indispensable requirement. As far as computational linguistics and natural language processing are concerned, the boundaries between the academics and the industry are becoming fuzzier. I find this change of landscape intriguing and am excited about the prospects of being part of it.

The fact remains that most languages are regarded as under-resourced, especially in the digital domain. Most languages of the eleven official languages in South Africa would be classified as such. There is enough reason to believe that the digital growth of a language can have a positive effect on the economic growth of its language communities, which in turn may lead to greater prosperity for the country in general. I hope that my current work on building language resources and technologies will at least make a tiny contribution to this noble cause.

In my free time, I like to play the piano, video games, chess and tennis, watch fiction, documentaries and sports, do programming, write creatively and argumentatively, travel, read fiction, spend time in nature, and read and discuss philosophy, natural science and technology. I also have a general interest in human culture, behaviour and current affairs, and often dream about a bright future featuring an improved standard of life, exciting new technologies, space exploration and increased human understanding, both of the world around us and of each other.
